Banner Health Selects EOS.Web® Enterprise

EOS.Web to improve access to information for one of the United States largest non-profit health care systems

(Carlsbad, CA – September 14, 2005) Market leader EOS International announces that Banner Health, one of the largest, nonprofit health care systems in the United States, has selected EOS.Web Enterprise to help satisfy their multi-site library automation requirements, replacing their EOS GLAS system. Banner employs nearly 26,000 in its 20 facilities over a 7 state geographic region, with revenues of \$2.6 billion. Banner has been an EOS International client since 1986.

In addition to basic emergency and medical services, Banner Health medical centers offer a variety of specialized services, including heart care, cancer treatment, delivery of high-order multiple births, organ transplants, bone marrow transplants, rehabilitation services, and behavioral health services. Banner is also involved in cutting-edge research aimed at helping patients suffering from some of the most serious diseases and conditions, including spinal cord injuries and Alzheimer's disease.

Banner is looking forward to taking advantage of the extensive, customizable reports available in EOS.Web Enterprise. In particular, they are looking forward to being able to run reports by location and date range. Now Banner Health will be able to run reports on new acquisitions, item usage, and serials listings by both location and date.

They are also looking forward to the ease of importing records from the National Library of Medicine using EOS.Web MARC Editor. The EOS.Web MARC Editor provides MARC-labeled editing screens for importing, exporting, adding and maintaining bibliographic records, complete with the display of valid MARC codes. A rules validation feature provides extensive, automatic error-checking of data entered in the record, improving the reliability of data entered.

About EOS International

EOS International is a leading global library information management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past two years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web® Express, EOS.Web® Enterprise, and hosted, EOS e-Library Service®) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes.
