Katten Muchin Rosenman LLP Upgrades to EOS.Web, Improving Productivity

600 Attorneys across multiple sites easily search the user-friendly EOS.Web OPAC from their desktops

(Carlsbad, CA - July 14, 2005) Market leader EOS International announces that the law firm of Katten Muchin Rosenman LLP has upgraded to EOS.Web, resulting in greater use of the Katten Muchin Rosenman library resources. Katten Muchin Rosenman is a nationwide, full service law firm with offices in 7 cities and an affiliated entity in London. The law firms' 600 attorneys had previously used EOS Q-Series.

EOS.Web is a customizable Web-based library automation solution built using Microsoft .NET technologies. The customizable EOS.Web OPAC allows users to gain access, search and explore library collections from remote sites, and offers a variety of search methods for both staff and end-users.

"Our attorneys are easily finding what resources are available in all offices," states Betty Roeske, Technical Services Librarian for the firm. "They are successfully using the catalog with few questions since searching is easy to learn."

EOS.Web anytime, anywhere connectivity enables information centers to provide knowledge workers access to all materials, as if the workers were physically in the library, with the research librarian available for making suggestions, recommendations, and delivering results.

"With EOS.Web, the functionality of the web is available to you. With the IP authentication a user can log into any computer and access the system with a valid network ID," states Roeske. "Plus, it is easy for staff to move between modules. The interconnection of the various modules improves the staff productivity in creating records."

About EOS International

EOS International is a leading global library information management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past two years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web® Express, EOS.Web® Enterprise, and hosted, EOS e-Library Service®) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes.
