## **Maine Medical Selects EOS.Web® Enterprise**

### **EOS.Web to improve access to information to one of New England's largest medical facilities**

(Carlsbad, CA – December 7, 2005) Market leader EOS International announces that the largest hospital in Maine, Maine Medical Center, has implemented EOS.Web Enterprise, replacing an upgraded ILS SQL-based system.

Maine Medical Center is the premier referral hospital for Maine and northern New England. Located in Portland, the 557-bed facility is both a teaching hospital and an active research center, providing comprehensive services in all medical specialties.

Maine Medical Center prides itself on offering the latest innovations in technology. The intuitive, easy-to-use interface of MARC-based EOS.Web Enterprise promises several ease of use process improvements for Maine Medical Center and they are also looking forward to being able to manipulate MARC fields and to easily create customizable reports.

Maine Medical Center was established in 1874 and has numerous historical materials they would like to catalogue and share with their users, so in addition to using EOS.Web for traditional hospital information access purposes, Maine Medical Center also will be using their new system for archival purposes.

#### **About EOS International**
