New EOS.Web® Clients Elevate EOS International to Leading Position in Medical ILS Market

EOS.Web information access integral to improved patient care

(Carlsbad, CA – January 5, 2005) Market leader EOS International announces that Woman’s Hospital in Baton Rouge, LA, formerly with Cybertools, and VA Medical Center of Tucson, AZ, formerly with SydneyPlus, have recently selected EOS.Web as their medical library automation and information access solution of choice.

With the securement of these clients, EOS International is solidifying its position as the premiere solution for health sciences libraries. In the past six months, EOS has established substantial relationships with several more leading medical organizations selecting EOS.Web including the American Academy of Pediatrics, Miami Children’s Hospital, Good Samaritan Hospital Tri-Health, California Pacific Medical Center, Cancer Center at St. Mary’s, Carilion Health System, Sharp Memorial Hospital, Kaiser Permanente, and Cox Health System.

“I attended an EOS.Web online webcast and ended up being very impressed with the friendly user interface of EOS.Web,” states Lynn Flance, Librarian for the VA Medical Center in Tucson. “Of particular interest to me is the ability to browse out to the Internet from within EOS.Web and directly import MARC records from online resources such as the National Library of Medicine.”

With over two decade's experience with leading research and health sciences libraries including EOS clients St. Jude Medical, the Armed Forces Medical Library, Naval Medical Center San Diego and Camp Pendleton Naval Hospital, EOS has played a key role in facilitating more effective access to quality information, not just for medical staff but for consumers and patients as well.

"EOS International has been selected to work with some of the most prestigious medical organizations world-wide," says EOS International CEO Tony Saadat. "We are proud that our solutions are relied on to turn raw information into useful knowledge and help improve patient care."

EOS International is a leading global library information management software and services provider with a client base of over 3,000 special libraries. A client-driven company nominated for a Computerworld Smithsonian award, EOS library automation software products (EOS.Web® Express, EOS.Web® Enterprise, and hosted, EOS e-Library Service®) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes.
