EOS International Announces Several New EOS.Web® Client Implementations

Web-based ILS solution EOS.Web to simplify operations and improve service to end-users

(Carlsbad, CA – October 27, 2006) World class library automation provider EOS International announces several clients have recently gone live with Web-based EOS.Web.

Healthcare giants Mallinckrodt Inc., Purdue Pharma, L.P., Watson Pharmaceuticals and hospital systems Clarian Health and Sacred Heart Medical Center expect to improve delivery of important information related to the medical industry with improved, simplified searching, thus improving service to end users.

Regional law firms Smith Haughey Rice & Roegge and Kronick, Moskowitz, Tiedemann & Girard can expect to simplify internal law library operations while global engineering firms like Black & Veatch improve access to internal information across the entire enterprise, while achieving their mission of ‘*Building a World of Difference*’.

The world’s leading source of agricultural seed technology, inoculants, and agronomic information, Pioneer Hi-Bred International and the Desert Botanical Library, will enjoy the easy access to educational research materials and achieve the results needed to be leaders in their fields.

And the #1 selling print encyclopedia in the world, World Book, Inc., will be able to reduce costs associated with cataloging their vast stores of information while providing easy access to information to their users.

Scalable, customizable design of EOS.Web meets the needs of small to large multi-site library or knowledge management resource centers, offering basic modules such as Cataloging (with an easy-to-use MARC Editor), Serials, Circulation, and Acquisitions as well as many advanced modules such as KnowledgeBuilder, Federated Searching, and Reference Tracking.

EOS.Web can be installed as a local, in-house, Web-based library automation solution running on a local network server, or hosted at the EOS Global Data Center via the popular EOS e-Library Service®.

About EOS International

EOS International is a leading global, world-class library information and knowledge management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past three years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web® Express, EOS.Web® Enterprise, and hosted, EOS e-Library Service®) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes. EOS International can be found online at <http://www.eosintl.com>.
