## **Northrop Grumman Selects EOS.Web® Enterprise Across Multiple Business Sectors**

### **EOS e-Library Service® chosen to help Northrop Grumman provide systems and technologies that ensure the security and freedom of our nation**

(Carlsbad, CA – November 29, 2006) World-class library automation provider, EOS International, announces that multiple business sectors within Northrop Grumman have selected EOS.Web Enterprise delivered via the library industry's most reliable ASP-hosted option, EOS e-Library Service, as their library automation solution of choice.

Northrop Grumman Corporation is a \$30 billion global defense and technology company whose 120,000 employees provide pioneering systems, products, and solutions in information and services, electronics, aerospace and shipbuilding to government and commercial customers worldwide.

Faced with the challenges of integrating print, digital, and multi-media content, libraries and information centers are turning to EOS.Web as their library automation solution of choice. Created exclusively for organizations that require all of the functionality of an enterprise-class solution, EOS.Web Enterprise is perfect for medium to large-sized special libraries. It is a fully Web-based system, built on Microsoft .NET technology and the SQL Server relational database. Its standards-based Web design enables users to quickly move from one module to another, reducing the number of steps they have to make to get the job done.

EOS e-Library Service offers a leading-edge, multi-lingual, cost-effective alternative to the conventional in-house library automation system. Rather than installing software on a local server supported by in-house staff, EOS.Web is hosted at the EOS Global Data Center located in the EOS International world headquarters building in Carlsbad, CA and supported directly by the same skilled technology and systems staff that developed it. Library staff and end-users access the software via a web browser over a secured Internet connection and experience the same functionality and appearance as if it were hosted locally.

### **About EOS International**

EOS International is a leading global, world-class library information and knowledge management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past three years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web® Express, EOS.Web® Enterprise, and hosted, EOS e-Library Service®) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes. EOS International can be found online at <http://www.eosintl.com>.
