## **Cadbury Trebor Bassett, the UK's Leading Chocolate & Confectionery Supplier Chooses EOS.Web® e-Library Service**

### **EOS e-Library Service® chosen to help Cadbury Trebor Bassett provide systems and technologies to manage their information needs more effectively**

(Nottingham, UK – April 24, 2007) World-class library automation provider, EOS International, announces that Cadbury Trebor Bassett have selected EOS.Web delivered via the library industry's most reliable ASP-hosted option, EOS e-Library Service, as their library automation solution of choice.

**The leader in the UK confectionery market**, Cadbury Trebor Bassett is the UK confectionery division of Cadbury Schweppes plc, one of the world's largest confectionery and soft drinks companies.

Faced with the challenges of integrating library and archive material, Information Manager Sarah Foden says, "EOS.Web will help us to simplify, update and incorporate new features into our Library and Archive catalogues. The Web interface and the ability to move seamlessly from module to module are very appealing from a workflow perspective."

Bernard Hunt, UK Account Manager, adds, "We are delighted that Cadbury have chosen our hosted option to move their library and archive services forward."

EOS e-Library Service offers a leading-edge, multi-lingual, cost-effective alternative to the conventional in-house library automation system. Rather than installing software on a local server supported by in-house staff, EOS.Web is hosted at the [EOS Global Data Center](#) located in the EOS International world headquarters building in Carlsbad, CA and supported directly by the same skilled technology and systems staff that developed it. Library staff and end-users access the software via a web browser over a secured Internet connection and experience the same functionality and appearance as if it were hosted locally.

### **About EOS International**

EOS International is a leading global, world-class library information and knowledge management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past three years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web® Express, EOS.Web® Enterprise, and hosted, EOS e-Library Service®) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes. EOS International can be found online at <http://www.eosintl.com>.
