EOS International Goes Green

More efficient systems and energy saving programs reduce corporate carbon footprint

(Carlsbad, CA – January 31, 2008) Leading library services and knowledge management company EOS International announced their first step in reducing corporate energy use by installing state-of-the art systems in the EOS global data center. The installation of the new VMWare and Dell SAN systems allow EOS to cut their data center’s electricity use by forty percent, while increasing the data center’s capacity.

“Installation of our new, energy-efficient servers is the first of many steps that EOS International hopes to take to become a more environmentally-responsible corporate citizen,” said Tony Saadat, CEO of EOS International. “We are committed to utilizing the most innovative technology possible to help reduce our environmental impact.”

“I am delighted to learn of EOS's intention to be more ‘green,’ said Marlene Vogelsang, MLS, Resource Specialist, Pacific Energy Center. “Energy efficiency is key to reducing energy use and reducing carbon emissions. I am glad that "my" server in Carlsbad is an efficient one! Congratulations on your efficient Global Data Center!” finished Voglesang.

The EOS Global Data Center’s initial installation of four new servers is the equivalent of forty older models. The new servers reduce costs associated with maintenance, temperature control, and additional space within the data center. Further roll-outs of this nature will take place throughout the year, once the benchmarks for operations are complete.

About EOS International

EOS International is a leading global, world-class library information and knowledge management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past three years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web[®] Express, EOS.Web[®] Enterprise, and the SaaS EOS e-Library Service[®]) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes. EOS International can be found online at <http://www.eosintl.com>.
