EOS INTERNATIONAL SCORES FURTHER VICTORIES IN HEALTH SCIENCES

Health Sciences Libraries Select EOS to Provide Access to Complex, Mission Critical Data

(Carlsbad, CA – January 28, 2008) EOS International, the internationally-recognized, premier library services provider, announced continued success in the health sciences and medical field. The five installations include the three new clients – Mercy Medical, Alcon, and Pinnacle Health – will allow the organizations to store, track, and access their collections using a single, EOS solution.

EOS previously entered the health sciences market with installations at the Health Sciences Library Network of Kansas City and St. Luke’s Hospital in Kansas City and Presbyterian Intercommunity Hospital in Whittier, to name a few. The new clients represent traditional medical practices as well as research and development organizations from three states – Iowa, Texas, and Pennsylvania, respectively.

“We strive to create the best solutions possible for our health sciences clients,” said Tony Saadat, CEO of EOS International. “As the health sciences field grows, EOS will continue to provide knowledge management solutions that provide continuing value to our clients’ organizations.”

About EOS International

EOS International is a leading global, world-class library information and knowledge management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past three years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web[®] Express, EOS.Web[®] Enterprise, and the SaaS EOS e-Library Service[®]) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes. EOS International can be found online at <http://www.eosintl.com>.
