EOS HELPS TRANSPORTATION DEPARTMENT SHARE DATA

Virginia Department of Transportation uncovers a wealth of hidden information

(Carlsbad, CA – May 1, 2008) Leading library services and knowledge management company, EOS International, completed the installation of EOS.Web at the Virginia Department of Transportation's (VDOT) Research Library. The 40,000 volume facility became completely web-based, allowing broad access to the collection through EOS's web-based interface.

Located on the University of Virginia campus, the VDOT research library selected EOS as their library automation vendor due to the broad functionality and modular based system. "EOS.Web allowed us to build a customized solution for our library," said Ken Winters, VDOT's Library Director. "EOS.Web has increased our visibility to Virginia's transportation community, as well as researchers from as far away as Europe and China."

"By focusing exclusively on special libraries," said Salvatore Provenza, Vice President of Global Sales and Marketing at EOS International, "we are able to provide highly customized solutions for our clients that are simply unavailable from other library automation vendors."

About EOS International

EOS International is a leading global, world-class library information and knowledge management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past three years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web[®] Express, EOS.Web[®] Enterprise, and the SaaS EOS e-Library Service[®]) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes. EOS International can be found online at <http://www.eosintl.com>.
