**SILICON VALLEY UNIVERSITY IS THE FIRST TO LICENSE EOS.WEB® ACADEMIC**  
***EOS International is hitting it big with the academic library community***

***(Carlsbad, CA – February 26, 2010)*** EOS International is proud to announce that Silicon Valley University is the first library to take advantage of its recently released EOS.Web® Academic product. EOS.Web Academic was officially released in September of 2009, with Silicon Valley University becoming the first customer in December of 2009. To date, EOS International now has five EOS.Web Academic clients and nearly 100 academic clients in total worldwide.

Mr. Scott Blake, Library Director at Silicon Valley University, stated, “We went with EOS, because they were able to work within our budget and provide us with more functionality than anyone else.” Blake also went on to say that, “I love the value of our EOS.Web product. Between the SaaS and unlimited client service, I knew we were getting much more than a great system.”

EOS International created the EOS.Web Academic product line in response to its popularity among the academic community. With its already extensive and still growing base of academic clients, EOS International’s Product Development Department created features specific to the needs of academic libraries. Now, EOS offers a solution especially equipped to empower academic libraries to manage their diverse and dynamic collections.

Salvatore Provenza, Vice President of Global Sales & Marketing, stated, “Our EOS.Web Academic solution answers the needs of academic libraries. With its robust list of academic features and low price, the system promises to be the best value on the market.”

EOS.Web Academic combines the powerful functionalities of EOS.Web to provide an unmatched, scalable solution. The product includes all EOS.Web foundation modules: Web OPAC, Cataloging, Circulation, Serials Management, Acquisitions, and Z39.50 Client & Server. It also features a dozen premium modules, such as: Inter-Library Loan, Course Reserves, KnowledgeBuilder, Media Bookings, Reference Tracking, SIP/3M SelfCheck, Indexer, IP Authentication, Electronic Content Management, Classification Management, ReportWriter, and Electronic Resource Management.

**About EOS International**

EOS International is a leading world-class library information and knowledge management software and services provider with an impressive client base of libraries across the globe. EOS International is a client-driven company that has earned the top customer satisfaction award for the past three years and earned a nomination for the Computerworld Smithsonian award. EOS library automation software products (EOS.Web Express, EOS.Web Enterprise, EOS.Web Academic, and the SaaS e-Library Service) serve the stringent knowledge and content management needs of corporate, legal, medical, government, and academic libraries of all sizes. EOS International can be found online at <http://www.eosintl.com>.
